TYPES OF MATERIAL ENCOUNTERED IN BORINGS (Use one of systems below)														7													
SC ML CL CH	UNIFIED CLASSIFICATION CW — Well graded gravel; gravel, sand mix GP — Poorly graded gravels; gravel—sand—silt mix GC — Clayey gravels; gravel—sand—clay mix SW — Well graded sands; sand—gravel mix SP — Poorly graded sands SN — Silty sand SC — Clayey sands; sand—clay mixtures SI, Silty sand SC — Clayey sands; sand—clay mixtures ML — Silts; silty, v. fine sands; sandy or alayey silt CL — Clays of low to medium plasticity CH — Inorganic clays of high plasticity SI — Silts silts SI — Silty silty of low to medium plasticity SI — silt loam CL — Clay loam SI — silty clay loam																										
2 -	1. Suitable material is available for practice. YES NO (Indicate where located on the sketch on reverse side) REMARKS: 2. Explain hazards requiring special attention in design (Seepage, spring, rock, etc.) GENERAL REMARKS:
