

VIRGINIA'S CONSERVATION LANDS

December, 2015

The Virginia DCR-Natural Heritage Program maintains data for all conserved lands in Virginia. These data are used to track state and regional land conservation goals, and for making local land conservation and land use decisions. In this map, all permanently conserved acres, up to December 14, 2015, were tallied in each jurisdiction allowing a quick assessment of the distribution of conserved lands, across the Commonwealth.

ACRES OF CONSERVED LANDS
